

Predicting Successful Extubation Clinical Pathway Report

Clinical Pathway 2nd Quarter Report 2018

Data Collection Period: 1 April 2018 - 30 June

Units using the clinical pathway: SSCU-B, MICU-C and MICU-L10

Data Sources: Retrospective review of Clinical Pathways

Total number of patients managed on this Clinical Pathway: 21

The utilization is unknown this quarter due to incompleteness of the extubation log sheet (Tracker).

Clinical Pathway Documentation Compliance		
Department / Discipline	Complete Documentation	Incomplete Documentation
Medical Doctor	47%	53%
SSCU-B Nurses (13 Patients)	62%	38%
MICU-L10 Nurses (2 Patient)	100%	0%
MICU-C Nurses (6 Patient)	33%	67%
Respiratory Therapy	47%	53%

Measures:

The ultimate outcome measure for this clinical pathway is that all patient will be extubated within five (5) days from the initiation of the pathway.

Summary:

Total number of patients managed on this Clinical Pathway was 20 as follow:

Day	Explanation
On day One	(8) patients were successfully extubated
On day Two	(8) patients were successfully extubated
On day Three	(3) patients were successfully extubated
On day Five	(1) patients was successfully extubated

Findings:

1. The number of successfully extubated patients is 20 (95%).
2. One patient was Trached post trail of extubation .
3. Pathway documentation compliance needed to be improved by all disciplines especially medical staff
4. The Clinical Pathway utilization is unknown, the tracker form was not fully completed by Respiratory Therapist this quarter.

Follow up Action Plan:

1. The report to be shared with the respective Healthcare Provider/ Medical Quality Director / Clinical Pathway Coordinator
2. Encourage the Healthcare Providers to utilize the clinical pathway nurse champion as a resource for any clarifications.
3. The clinical pathway coordinator to reinforce the importance of utilization of the tracker form during monthly rounds.
