

2017 Performance Improvement Report STRATEGIC PRIORITY

3. Improve efficiency and decision-making

Project Name

Central Line Securement Device

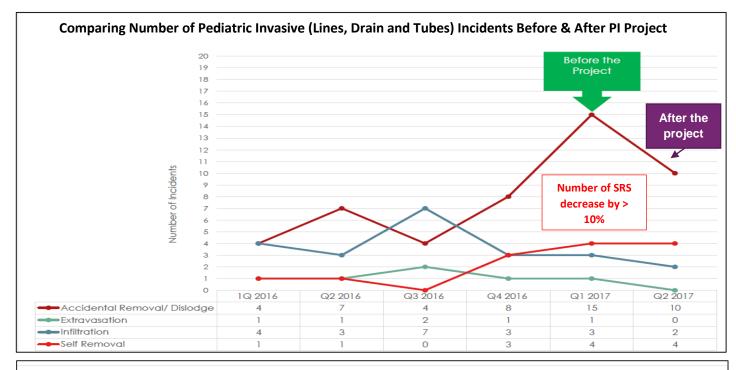

Site		Department	
Riyadh		Pediatric Nursing	
Project Status	Project Start Date	e Project End Date	
Completed	02-01-2017	09-30-2017	
Problem: Why the project was needed? In the las year, it was noticed that there was a significant increase in incidents of accidental line removal and CLABSI infection rate in pediatric oncology. Therefore, this project was selected to decrease the incidence of accidental line removal and to decrease CLABSI rate		Aims: What will the project achieve? To decrease CLABSI rate & number of reported SRS related to accidental removal, infiltration and self-line removal by 10% from baseline by September 2017.	
Benefits/Impact: What is the (check all that apply) □ Contained or reduced cos □ Improved productivity □ Improved work process □ Improved cycle time □ Increased customer satist □ Other (please explain) Click or tap here to enter	faction	Quality Domain: Which of the domains of healthcare quality does this project support? <i>(Select only one)</i> Safe	

Measures: Performance metrics to be evaluated	Targets: Expected outcomes
1. CLABSI infection rate (%)	1. 10%
 Number of reported SRS related to accidental removal, infiltration and self-removal (%) 	2. 10%

Interventions: Overview of key steps/work completed

- Introduction of a new securement device specific for central line and trial utilization.
- Modifying and standardizing the current process of securing central line in pediatrics.
- Evaluate the product utilizing a standardize tool.
- Update the current central line maintenance bundle.

Results: Insert relevant graphs and charts to illustrate improvement pre and post project (*insert relevant graphs, data, charts, etc.*)
