Improve KFSHRC-J Patient and Visitor Experiences

Site

Jeddah

Department

Nursing Affairs/Registration, Appointments & Admission Services.

Project Status

Completed

Project Start Date

01-01-2018

Project End Date

03-29-2018

Problem: Why the project was needed?

Patient experience has become one of the main strategic goals for the organization as “Patient Centric” is one of our core values.

The project was focused on improving the experiences for the patients, visitor and staff in related to information, directions and solving problems.

The idea to utilize the main gate area has been initiated to establish the “Information Desk” to be the front line services to greet, assist and direct patients, relatives and visitors with any related information or inquires to reduce time and to facilitate the workflow.

Benefits/Impact: What is the improvement outcome?

(check all that apply)

- Contained or reduced costs
- Improved productivity
- Improved work process
- Improved cycle time

- Other (please explain)
Click or tap here to enter text.

Aims: What will the project achieve?

In view of the recent observed repeated questions and inquiries from patients and visitors to hospital staff about the directions of hospital’s departments and clinics, this project was chosen to Improve KFSHRC-J Patient and Visitor Experiences and ensure provide the best practice guidance to KFSHRC-Jeddah patients and visitors in the most efficient manner.

Quality Domain: Which of the domains of healthcare quality does this project support?

(Select only one)

Patient Centred

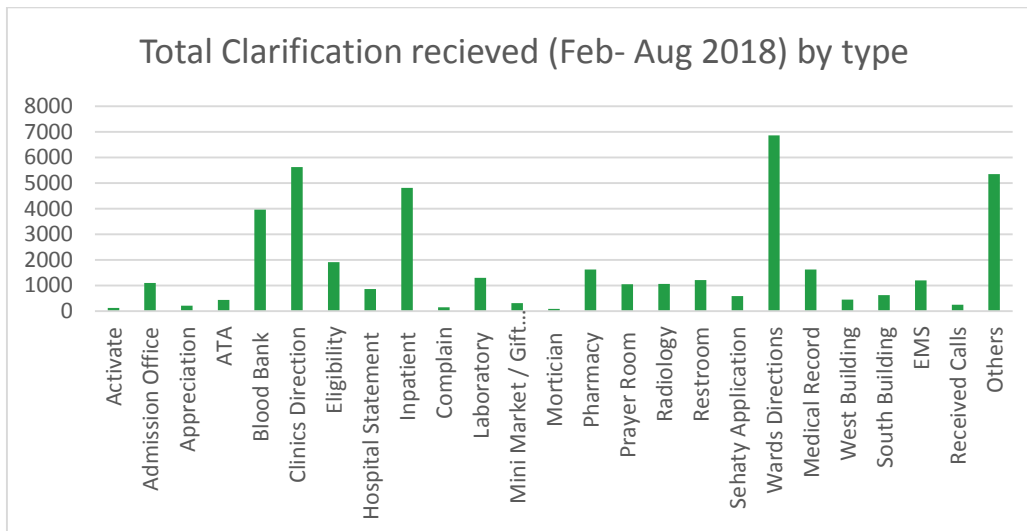

Interventions: Overview of key steps/work completed

- Task force has been created in collaboration with Admission and Registration Department and Security Department to identify the roles of each department.
- Follow up meetings were conducted biweekly to observe and identify the issues and areas to improve.
- Setting up the Information Desk with two PCs along with ICIS linked printer and two phone lines to facilitate the workflow and to make sure all patient, visitors get served during the day and visiting hours.
- A data base has been created for the Information Desk to collect and log all customers’ inquiries.
- Areas for improvement have been identifies and actions were taken place towards a better Patient Experience outcome.

Results:

There was no previous data as the Information Desk was just established. During (7) months period (February –August 2018), over 28500 customers were served with remarkable positive feedback.
