Correct Steps for Using Alcohol-based Hand Sanitizer

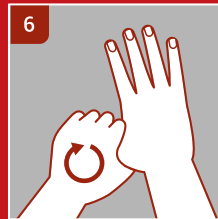

1 Apply an adequate amount of alcohol sanitizer (at least 60% alcohol) on both hands

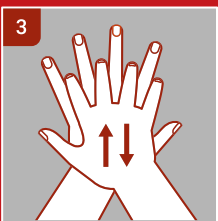

5 Lather your hands by rubbing the palm of each hand using the knuckles of the other hand while joining your fingers

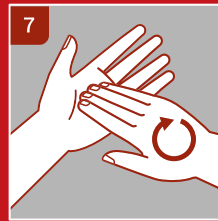

2 Rub the palms of your hands

6 In a circular motion rub the back of each hand using the thumb of the other hand

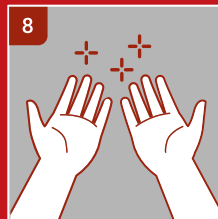

3 Use the palm of your hand to rub the back of your other hand

7 Rub the palm of each hand in a circular motion forward and backward

4 Lather soap between your fingers while rubbing the palms of your hands

8 Wait until your hands are completely dry
