Tips for Safely Applying Alcohol-based Hand Sanitizer

Apply a coin-sized amount of the sanitizer, not too much.

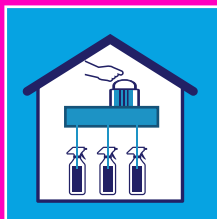

To prevent irritation, avoid touching eyes, nose and mouth immediately after applying the sanitizer.

Avoid cooking or any flame source after applying the sanitizer as it could be flammable.

Supervise kids when they are applying the alcohol hand sanitizer. Swallowing the sanitizer could be poisonous.

Avoid making homemade alcohol hand sanitizer as it maybe ineffective or unsafe.

Store it in a dry place, away from high temperatures, flames and reach of children.
