

# Safety Alert

## Safety Reporting System (SRS) in the Time of COVID-19

We recognize that our colleagues and Hospital operations are deeply affected by the current COVID-19 pandemic. Several incidents have been reported recently related to the unique pressures, staffing issues, environment, supplies, communication, shortages, and impacts generated by this crisis.

We encourage you all to take time and report any incident that compromises patient/staff safety. This will show clear evidence of your commitment to safety and reliability culture.

**We owe it to our patients to report Incidents, Adverse Events, and Near Misses.**
